A LUXURY COLLECTION HOTEL

The *Urban Jungle* collection is a creative accomplishment and a technical advancement utilizing the Perennials genuine solution-dyed acrylic technology. All Perennials fibers are independently lab tested and are certified so they comply with or exceed industry standards including resistance to soil, water, UV radiation, tearing and abrasion. This collection also features Perennials Nano Seal™ finish for extra protection against the elements. More than just a coating, Perennials Nano Seal™ is molecularly bonded with the fibers providing long-lasting protection, even after repeated washings. Because Perennials fibers are solution-dyed, the color permeates to the core, enabling Perennials to confidently offer a three year warranty against fading.

Caring for the environment is part of the Perennials culture and we're committed to producing textiles in an environmentally responsible way. The water used during the fiber manufacturing process is purified and returned to its natural source. Environmentally friendly natural gas provides the energy needed to generate steam and electricity for multiple aspects of the fiber production. Waste is safely recycled through incineration, with the heat being used as an additional energy source for our steam network. From fiber technology, to design, to quality assurance, every step in the production process is under Perennials care and control. All very good reasons why Perennials fabrics have character and longevity like no other.
