**FISHY FABRICS**

Perennials Outdoor Fabrics introduces a new collection with a marine theme. 'Aquaria' is composed of five contemporary prints, textures and weaves which take inspiration from the sea. Textiles range from, Holy Mackerel! — an eye catching fish print, to *Spongy* — a light interwoven textile with the touch of natural sea sponge. Available in eleven soft hued aquatic colours, which suggest a tropical coral reef such as opaque white, buttery yellow, soft salmon pink and periwinkle blue.

Perennials Outdoor Fabrics are 100% solution dyed acrylic; and soil, mildew and UV resistant with a three year no fade warranty.

**FORM FOLLOWS FUNCTION**

Producers of technically designed ironmongery, Vieler International, present its new product catalogue "Architectural Hardware."

Vieler has reconsidered its entire product range and adapted it to fall in line with its guiding design principle of 'form follows function'. Vieler lever handles retain their essential function but with a renewed focus on design. The form has been worked on until no superfluous elements remain, and handles are smooth, elegant and classical.

The simplicity of the unimposing handles has an improved ecological aspect as Vieler has concentrated on a responsible use of materials and resources in its new designs.

Architects and designers are able to obtain the new product catalogue, "Architectural Hardware" free of charge.
