MARCH 2009

So fabulous

Selected pieces by the late legendary designer Tony Duquette are being reproduced by Baker. Some are objects of desire for a garden room, like the *Ghost Snail* and *Terrapin Lamp*, shown, that glow with light through their shells. The *Macao Garden Seat*, left, in the original coral or pearl white, is cast from resin and works outside (or indoors) as a table or seating. Baker Furniture, through Seaside Home in La Jolla and other locations; Nettle Creek Interiors, Golden Triangle.

Wild ones

Sheers and bold graphic designs make up this exciting *Wild Side* collection of outdoor Perennials Fabrics inspired by the African plains. Sofa, ottoman and table from the *Sutherland Poolside Collection*. Through your designer at David Sutherland Showroom, West Los Angeles.

Lattice look

Santa Barbara Umbrellas are head turners, particularly with this whipped-cream lattice design on a camel cover. Through Hauser Patio, Morena and La Costa.
